GOULD ACADEMY

Bausch and Lomb Award

Ira Hubbard and Rafael Gutierrez have been named as the 1962 winners of the Bausch and Lomb Award at Gould Academy. This is an honorary science award given to the student, in this case two students, who displays evidence of superior scientific aptitude.

Headmaster Edmond J. Vachon of Gould said "These aw ards are especially significant. Today, everyone realizes the importance of the study of science in our secondary schools. The Bausch and Lomb Honorary Science Award provides appropriate recognition to senior students with the highest scholastic standing in science subjects."

The Science Award-a handsome bronze medal--is presented at graduation in more than 7500 schools. Since its introduction in 1933, there have been more than 154,000 winners. Surveys have revealed that more than 30% of the winners have been encouraged by the award to follow scientific careers.

The winners are eligible to compete for science scholarships sponsored by Bausch and precede the start on the new Lomb, Inc., at the University of Rochester. Three or more scholarships are provided an- soon released. nually. Stipends are based on need and have total combined cludes several town students value of \$21,600.

GOULD SENIOR PLAY CAST READY TO GO

A fast moving comedy in three acts entitled "Ask Any Girl," adapted by Christopher Sergel from the book by Winifred Wolfe, has been selected by David Thompson as the eighteenth senior play he has directed at Gould. In its motion picture production it featured Shirley MacLaine and David Niven in the leading roles and was held over for weeks at the Radio City Music Hall as one of its most successful hits.

Rehearsals got underway this week and will be held at a fast tempo till production date, Friday, March 10. It is interesting to note that this will be the last dramatic production to be held in the William Bingham Gym, following only a few weeks after the very successful and entertaining three one-act plays produced and directed by Frank Vogt on January 27; construction work and remodeling of the gym floor, including a complete removal of the stage and all its facilities will auditorium, complete information concerning which will be

GOVERNOR REED NAMES FEBRUARY HEART MONTH

Governor John H. Reed today proclaimed February to be Heart Month in the State of Maine.

The Governor signed the proclamation in the presence of L. Robert Porteous, Jr., Portland, State Heart Fund Campaign Chairman, and Maine Heart Girl of the Year, Marie Anita Fortin, Augusta, during a brief ceremony at the State House and called on all residents, schools, churches and organizations to support the drive against heart and circulatory diseases.

The 1962 Heart Fund Drive, conducted by the Maine Heart Association, opens today and will continue through Feb. 28. Heart month will reach its climax on Heart Sunday, Feb. 25, when volunteers will cancan nomination for the office vass their neighborhood for contributions.

Blonde, eight year old Marie Fortin was chosen Maine Heart Girl of the Year after undergoing surgery at the Maine Medical Center, Portland, in December for serious heart defects. The surgery included the opening of a heart partition and a pulmonary valve and finally the closing of a hole in the antrim of the heart. She retary-Treasurer of this organi- turned to school Jan. 8 where zation. She is also a member she can now run and play like of the Maine Town Clerks As- a normal child. She is no longer sociation. "The hour is coming, and ers will worship the Father the Father seeds to worship him." (John 4:23 RSV.)

When we were children on the farm, we frequently spent Sunday afternoons in the summer climbing the hills. By the time we thought we were high enough to risk drinking water from a stream, we scooped up a cool drink with our hands. Because we were thirsty, we did not miss the usual containers from which to drink.

Being thirsty and in the presence of pure water, did we stand locking at our hands, admiring them, discussing size and shape of palms, and length and taper of fingers? No, we water. washed them and drank of the fresh water,

In the story of the woman of Samaria, we read that she later left her water jar for the now is, when the true worship- higher mission. Can we today worship the Father "in spirit in spirit and truth, for such and truth" unless we leave our water jars for the higher mission—worship of God and fellowship with one another?

AMA OFFERS HEALTH TIPS - COLDS

The weather is cold and raw in most of the nation at this season of the year, and most of us sometime or other this winter will have a cold in the head.

And a lot of us will spend money for pills and other nostrums to "cure" our colds. This money, almost every bit of it, will be wasted. We'll still have a cold until the body's protecmanageable numbers.

As kids we used to hear an adage: Treat a cold and you alone and it will go away in a fortnight. The time element isn't quite that exact, but the theory is the same.

Today's Health, the magazine of the American Medical Association, offers a few commonsense suggestions about colds. The "remedy" is the same as in Grandma's day. Stay home, in bed if you can, take aspirin for the discomfort, keep warm, gargle to ease a sore throat. Various vitamins, ultraviolet light and bacterial vaccines have been offered as cold cures. Carefully controlled experiments have discredited all of them.

Mothers who have colds should wear masks when attending small infants. Colds in young babies should be treated with respect. If the baby has a severe cold, call a physician. Babies suffer much discomfort with a cold, and there's always the chance that it isn't a cold but something more serious.

The Illinois State Medical Journal offers the following definition of a cold:

"Present information leads us to believe that the common cold is a group of infections caused by a number of different but closely related viruses. These diseases have in common the fact that the incubation period is short-from one to four days-and the symp- of South Portland were guests cough, fever. The cold itself lasts from three to six days, longer only if complications develop."

A vaccine to protect against colds would have to include each of the different viruses responsible. Scientists aren't yet certain how many different viruses are involved. Until all of the viruses are tracked down and cataloged, no cold vaccine could be more than partially successful.

In the season of colds, use Wilmer Bryant and the guest and Mrs. Hugh Swan. Decora- sleep. Forget about the fad properly, get plenty of rest and cures. If your cold persists, call your physician.

HERMAN E. BILLINGS

Heiman E. Billings of Bryant Pond died at his home last Thursday after a long illness.

Born at Woodstock, in the Billings Hill district, Oct. 23, 1879, he was the son of Emerson and Anna Russell Billings. He was educated in local schools and married Bessie Bryant, Dec. 23, 1901.

Mr. Billings had been engaged in farming, was a lumberman, and operated a roadside stand and filling station during the summer months. He retired from active farming in May, 1947, and his farm was taken over by his son-in-law, LaForest Twitchell. Mr. and Mrs. Billings continued to live at the farm and he still operated his lumbering business and filling station.

Mr. Billings was an arcist. sportsman and outdoorsman; and had a miniature museum filled with stuffed animals of all kinds in a room adjoining his filling station. He had served on the school board for three years and was a life member of Franklin Grange and Jefferson Ledge, F. and A. M. He played right field on the Bryant Pond-West Paris Oxford County Championship team during the early 1900's.

He is survived by his widow. Bessie B. Billings; a son, Royden, principal of Old Town Junior High School; two daughters, Mrs. Dorothy Hooper, teacher at the Kaler School, South Portland, Mrs. Eva Twitchell, RN, Bryant Pond, and three grandchildren.

Funeral services were held Saturday afternoon at the Andrews funeral home, Rev. Gunnar Lindahl efficiating, Masonic services were conducted by Jefferson Lodge.

MT. ABRAM SKI SLOPES

Abram the place TV "SPECTACULAR" TO for "friendly family fun."

Bates College Outing Glub returned again this year to enjoy skiing and skating. Over one hundred students arrived at Mt. Abram on Friday by buses and private cars, to spend the day, John Allen, amateur ski instructor from Bates College, returned also on Saturday and Sunday with several other skiers. Allen, who has skied all the major slopes in the east, felt that the Cross Bros. have nice engineered trails which are wide and well groomed to lessen the danger of accidents.

Harold Brown, ski coach for Oxford Hills High School, announced Saturday that he plans to bring his own ski team up to Mt. Abram on Tuesdays and Thursdays of each week

New Arthritis Test Developed By March of Dimes Research

A new and sensitive blood test for diagnosing rheumatoid arthritis in children was one of the medical achievements of 1961 highlighted by The National Foundation in a year-end review of progress by March of Dimes-supported scien-

The report, by Dr. Thomas M. Rivers, vice president for medical affairs of The Founda-tion, cited accomplishments related to birth defects, virus diseases, polio and genetics as well as arthritis,
Dr. Rivers also noted that 1961 will be memorable because

of the licensing by the U.S. Government of two of the three component types of Sabin oral polio vaccine which, like the Salk killed-virus vaccine, was

developed with money given to the March of Dimes.

The new arthritis test was developed by Dr. Morris Ziff and his research associates at the University of Texas Southwestern Medical School in Dallas. In their studies, the test proved positive in 76 per cent proved positive in 76 per cent of children with rheumatoid arthritis. By contrast, other tests currently in use seldom pinpoint the disease in more than 20 per cent of youngsters known to have it, according to

few people realize how very serious rheumatoid arthritis serious rheumatoid arthritis
can be in children, or how
common it is among them. It is
estimated that there are about
30,000 children under 15 in the
U.S. who have it, many of
whom are severely crippled, he
said.

disease.

other youngsters may have the disease, with perhaps only minor or vague pains and no clear-cut symptoms to label arthritis as the culprit.

The arthritis test, which is particularly sensitive in detecting an unusual blood factor frequently found in persons with rheumatoid arthritis, may fill its greatest role in uncovering undiagnosed rheumatic disease in children.

This report was made by a research by Dr. Councilman research team headed by Dr. Morgan and associates at Columbia University. Another group of workers at the University of Michigan described similar results with techniques involving use of fluorescent materials.

1. Dr. Joseph L. Melnick of Baylor University has come up with two chemical discoveries that promise major improvements in the manufacture of by Dr. George Dempster and
